### Performance Review

This Annual Report covers the twelve-month financial year from 1 January 2025 to 31 December 2025.

The Fund posted a return of 3.16% (based on NAV Per Unit-to-NAV Per Unit basis with gross income (if any) from the Fund reinvested) in the past twelve months while its benchmark the BNM Islamic Interbank Overnight Rate registered a return of 2.94%. During the financial year under review, the Fund had distributed 52 times of income distributions to its Unit holders. Unit holders should note that income distributions have the effect of reducing the Net Asset Value (NAV) per unit of the Fund after distributions. For a full description of the income distributions, cum-distributions and ex-distributions NAV per unit of the Fund, kindly refer to section entitled 'Performance Data' at page 49-64.

For the five financial years ended 31 December 2025, the Fund has registered a return of 14.59% compared to the benchmark's return of 13.53% while distributing a total gross income of 5.5816 sen per unit (net income of 5.5816 sen per unit).

There have been no significant changes to the core asset allocation of the Fund during the financial year under review.

Currently, the Fund’s duration is approximately 1.56 months.

**An explanation on the differences in portfolio composition**

There have been no changes in portfolio composition as all investments are being invested with the local Islamic banks in Malaysia.

**Operational review of the Fund**

For the financial year under review, there were no significant changes in the state of affairs of the Fund or circumstances that would materially affect the interest of Unit holders up to the date of this Manager’s report.

#### IV. MARKET REVIEW

During the financial year under review, the Federal Reserve (Fed) had entered a period of holding rates steady for the first eight months. The pause was a reflection of the conflicting signals in the economy. The Fed's September meeting marked a return to rate cuts with a 25-basis point reduction to a new target range of 4.00%-4.25%. It was widely anticipated by the market and this move signalled a shift in the Fed's primary concern from fighting inflation to mitigating a weakening labour market. The Fed decided to act pre-emptively, acknowledging that the balance of risks now favoured protecting employment mandate. On October 2025, Fed delivered a second 25-basis point cut to 3.75%-4.00%. The federal government shutdown was viewed as a significant headwind to the Gross Domestic Product (GDP) growth. Private sector data pointed that manufacturing activity and consumer sentiment were slowing down. Moving into December, the Fed delivered its third and final 25-basis point cut of the year to 3.50%-3.75%. While the cut itself was widely anticipated, the meeting revealed a significant shift in forward guidance, signalling that the phase of cuts had likely reached its end. Chair Powell stated that the Federal Funds Rate (FFR) is now within a broad range of estimates of its neutral value, meaning it is no longer actively working to slowdown the economy.

In 2025, Malaysia's inflation held steady at 1.7% in January (December 2024: 1.7%) in line with the rising cost in sector such as transport, dwelling maintenance and restaurants. Inflation showed signs of modest data easing to 1.5% in February. This is reflected slower growth in key categories such as housing and utilities. In March and April's inflation surprised on the downside pulling back unexpectedly to 1.4%. The softer data was due to continued slower gains in non-food prices and most notably housing & utilities. Moving into May, inflation eased to 1.2% driven by lower prices across almost all components, except for restaurant & accommodation services, health care as well as furnishings, household equipment & maintenance. Inflation in June further surprised on the downside marking its lowest point to 1.1% since February 2021 primarily driven by a slowdown in transport costs and moderated price increase in accommodation services. Moving into July and August, inflation rebounded slightly to 1.2% and 1.3% following the expanded Sales and Service Tax (SST) that took effect on 1 July 2025. September marked the peak of the acceleration within this three-month window with inflation rising to 1.5%. In October and November, inflation moderating back down to 1.3% then rebounded to 1.4% due to slower increase in the three biggest category which is food and beverages, utilities and transport.

Meanwhile, Malaysia's economy expanded at a faster pace of 5.2% in the third quarter of 2025 (2Q 2025: 4.4%), the same as the advanced estimate and market consensus. This marks the fastest quarterly growth in a year, surpassing the 4.4% expansion recorded in the first two quarters of 2025. The external sector saw a significant rebound, with net exports registering higher growth as export expansion outpaced import growth. Global demand for Electrical and Electronics (E&E) goods, combined with recovery in mining related exports supported this improvement, despite ongoing global trade uncertainties and tariffs. Household spending remained the primary anchor of growth, supported by a favourable labour market. Investment was sustained by continued capital expansion across both the private and public sectors.

BNM took a significant step in its July Monetary Policy Committee (MPC) meeting by reducing the Overnight Policy Rate (OPR) 25 basis points (bps) to 2.75% marking the first rate cut in over two years. This policy adjustment reflected the central bank's growing concern over the sustainability of Malaysia's economic recovery amid rising external risks and subdued inflationary pressures. BNM maintained the OPR at 2.75% throughout the second half of 2025 given resilient domestic growth outlook and easing global uncertainties following the conclusion of more trade negotiations. The tone of the statement remains broadly neutral, consistent with the September meeting guidance. More importantly, the statement refrained from any forward guidance or pre-commitment to future policy shifts, reaffirming a fully data-dependent approach heading into 2026.

#### V. FUTURE PROSPECTS AND PROPOSED STRATEGIES

Malaysia's economic outlook entering 2026 remains positive, supported by firm labour market and resilient domestic demand, with unemployment steady at 3.0% and employment growth continue to strengthen. Inflation remains stable despite recent subsidy rationalisation with full year forecasts maintained at 1.5% for 2025 and 2.0% for 2026. BNM assessed that the growth outlook will remain resilient going forward, supported by robust tech investment, sustained domestic demand. BNM will continue to monitor ongoing developments and assess the balance of risks surrounding the outlook for domestic growth and inflation.

As such, the Fund target to increase returns while moderately lengthening duration of Islamic money market placements.

# INDEPENDENT AUDITORS' REPORT

## TO THE UNIT HOLDERS OF HONG LEONG DANA AL-IZDIHAR

### REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

#### Our opinion

In our opinion, the financial statements of Hong Leong Dana Al-Izdihar ("the Fund") give a true and fair view of the financial position of the Fund as at 31 December 2025, and of its financial performance and its cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards.

#### What we have audited

We have audited the financial statements of the Fund, which comprise the statement of financial position as at 31 December 2025, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the financial year then ended, and notes to the financial statements, including material accounting policy information, as set out on pages 17 to 48.

#### Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence and other ethical responsibilities

We are independent of the Fund in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

#### Information other than the financial statements and auditors' report thereon

The Manager of the Fund is responsible for the other information. The other information comprises the Manager's Review and Report, but does not include the financial statements of the Fund and our auditors' report thereon.

Our opinion on the financial statements of the Fund does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Fund, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Fund or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Manager for the financial statements

The Manager of the Fund is responsible for the preparation of the financial statements of the Fund that give a true and fair view in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards. The Manager is also responsible for such internal control as the Manager determines is necessary to enable the preparation of financial statements of the Fund that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Fund, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Fund or to terminate the Fund, or has no realistic alternative but to do so.

### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Fund as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Fund, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.

- (d) Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Fund or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Fund, including the disclosures, and whether the financial statements of the Fund represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### OTHER MATTERS

This report is made solely to the unit holders of the Fund and for no other purpose. We do not assume responsibility to any other person for the content of this report.

# NOTES TO THE FINANCIAL STATEMENTS

## FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025

### 1. THE FUND, THE MANAGER AND THEIR PRINCIPAL ACTIVITIES

Hong Leong Dana Al-Izdihar (“the Fund”) was constituted pursuant to the execution of a Deed dated 6 April 2017 and Supplemental Deeds dated 19 September 2019, 25 May 2021, 7 October 2021, 18 May 2022 and 30 January 2023 (collectively referred to as “the Deeds”) between Hong Leong Asset Management Bhd (“the Manager”) and CIMB Islamic Trustee Berhad (“the Trustee”) for the unit holders of the Fund.

The Fund aims to provide investors regular income while maintaining capital stability by investing primarily into Islamic deposits and Islamic money market instruments.

The investments of the Fund will essentially be in Islamic deposits, Investment Account and Islamic money market instruments that will mature within 397 days. At least 90% of the Fund’s net asset value will be invested in such instruments in Malaysia. However, the Fund is permitted to also invest in Islamic deposits, Investment Account and Islamic money market instruments (e.g. Islamic negotiable instruments of deposits (INID)) with maturity periods of more than 397 days but no longer than 732 days in Malaysia and these investments are limited to 10% of the Fund’s net asset value. The Fund commenced operations on 20 June 2017 and will continue its operations until terminated as provided under Part 12 of the Deed.

The Manager of the Fund is Hong Leong Asset Management Bhd, a company incorporated in Malaysia. The principal activity of the Manager is the management of unit trust funds, private retirement schemes and private investment mandates. Its holding company is Hong Leong Capital Berhad, a company incorporated in Malaysia and listed on the Main Market of Bursa Malaysia Securities Berhad.

Hong Leong Islamic Asset Management Sdn Bhd (“HLISAM”) is the external fund manager appointed for Hong Leong Dana Al-Izdihar. The effective date for the appointment is on 17 April 2020. HLISAM is a wholly owned subsidiary of the Manager. On November 2019, HLISAM was issued with an Islamic fund management license by the Securities Commission Malaysia (“SC”) to undertake the regulated activity of Islamic fund management.

### 2. MATERIAL ACCOUNTING POLICY INFORMATION

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements:

#### (a) Basis of preparation

The financial statements have been prepared in accordance with the Malaysian Financial Reporting Standards (“MFRS”) and International Financial Reporting Standards.

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and International Financial Reporting Standards requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported financial year. It also requires the Manager to exercise their judgement in the process of applying the Fund’s accounting policies. The Manager believes that the underlying assumptions are appropriate and the Fund’s financial statements therefore present the financial position results fairly. Although these estimates and judgement are based on the Manager’s best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(i).

- (i) Standards, amendments to published standard and interpretations that are applicable and effective:

The Fund has applied the following standards and amendments for the first time for the financial year beginning on 1 January 2025:

- Amendments to MFRS 101 'Classification of liabilities as current or non-current' clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the entity's expectations or events after the reporting date (e.g. the receipt of a waiver or a breach of covenant).

- (ii) Standards and amendments that have been issued that are applicable to the Fund but not yet effective:

- Amendments to MFRS 9 and MFRS 7 'Amendments to the Classification and Measurement of Financial Instruments' (effective 1 January 2026):
  - The amendments clarify that financial assets are derecognised when the rights to the cash flows expire or when the asset is transferred, and financial liabilities are derecognised at the settlement date (i.e. when the liability is extinguished or qualifies for derecognition).
  - There is an optional exception to derecognise a financial liability at a date earlier than the settlement date if the cash transfer takes place through an electronic payment system, provided that all the specified criteria are met;

- The amendments also clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest ("SPPI") criterion;
- There are additional new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
- The amendments update the disclosures for equity instruments designated at fair value through other comprehensive income ("FVOCI").

- MFRS 18 'Presentation and Disclosure in Financial Statements' (effective 1 January 2027) replaces MFRS 101 'Presentation of Financial Statements'.
  - The new MFRS introduces a new structure of profit or loss statement.
    - (a) Income and expenses are classified into 3 new main categories:
      - i. Operating category which typically includes results from the main business activities;
      - ii. Investing category that presents the results of investments in associates and joint ventures and other assets that generate a return largely independently of other resources; and
      - iii. Financing category that presents income and expenses from financing liabilities.

- (b) Entities are required to present two new specified subtotals: 'Operating profit or loss' and 'Profit or loss before financing and income taxes'.
- Management-defined performance measures are disclosed in a single note and reconciled to the most similar specified subtotal in MFRS Accounting Standards.
- Changes to the guidance on aggregation and disaggregation which focus on grouping items based on their shared characteristics.

The Fund is currently still assessing the effect of the above standards and amendments. No other new standards or amendments to standards are expected to have a material effect on the financial statements of the Fund.

## **(b) Financial assets and financial liabilities**

### Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its Shariah-compliant investments based on both the Fund's business model for managing those financial assets and the contractual cash flows characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities<sup>1</sup> as fair value through other comprehensive income. The contractual cash flows of the Fund's debt securities<sup>2</sup> are solely principal and profit. However, these Shariah-compliant securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all Shariah-compliant investments are measured at fair value through profit or loss.

The Fund classifies cash at bank as financial asset measured at amortised cost as this financial asset is held to collect contractual cash flows consisting of the amount outstanding.

The Fund classifies amount due to the Manager, amount due to the Trustee, distribution payable and other payables and accruals as financial liabilities measured at amortised cost.

### Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Fund commits to purchase or sell the asset. Shariah-compliant investments are initially recognised at fair value.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

<sup>1</sup> For the purposes of the investments made by the Fund, equity securities refer to Shariah-compliant equity securities.

<sup>2</sup> For the purposes of the investments made by the Fund, debt securities refer to sukuk.

Financial assets are derecognised when the rights to receive cash flows from the Shariah-compliant investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Islamic deposits with licensed financial institutions are stated at fair value. Due to the short term nature of the Islamic deposits, the cost plus accrued profit calculated based on the effective profit rate method over the period from the date of placement to the date of maturity of the respective Islamic deposits is a reasonable estimate of fair value. Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective profit rate method.

#### Impairment

The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward looking information in determining any expected credit loss. Management considers the probability of default to be closed to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Fund.

#### Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

#### Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit-impaired.

#### Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of obligor's sources of income or assets to generate sufficient future cash flows to pay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial year.

#### **(c) Functional and presentation currency**

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

#### **(d) Income recognition**

Profit income from cash at bank and Islamic deposits with licensed financial institutions are recognised on the effective profit rate method on an accrual basis.

Profit income is calculated by applying the effective profit rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective profit rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

#### **(e) Cash and cash equivalents**

For the purpose of statement of cash flows, cash and cash equivalents comprise cash at banks and Islamic deposits held in highly liquid Shariah-compliant investments that are readily convertible to known amounts of cash with an original maturity of three months or lesser which are subject to an insignificant risk of changes in value.

**(f) Taxation**

Current tax expense is determined according to Malaysian tax laws at the prevailing tax rate based on the taxable profit earned during the financial year.

**(g) Distributions**

A distribution to the Fund's unit holders is accounted for as a deduction from realised reserve. A proposed distribution is recognised as a liability in the financial year in which it is approved by the Board of Directors of the Manager.

**(h) Unit holders' capital**

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the unit holder to a proportionate share of the Fund's net asset value;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase the units; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss and change in the net asset value of the Fund.

The outstanding units are carried at the redemption amount that is payable at the date of the statement of financial position if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's net asset value per unit at the time of creation and cancellation. The Fund's net asset value per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

**(i) Critical accounting estimates and judgements in applying accounting policies**

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgements are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the Securities Commission Malaysia's Guidelines on Unit Trust Funds.

However, the Manager is of the opinion that there are no accounting policies which require significant judgement to be exercised.

**3. FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES**

The Fund is exposed to a variety of risks which include market risk (inclusive of interest rate risk), credit risk, liquidity risk, capital risk and Shariah status reclassification risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the prospectus.

The following table analyses the financial assets and financial liabilities of the Fund in the statement of financial position as at the reporting date:

	Financial assets at FVTPL RM	Financial assets/liabilities at amortised cost RM	Total RM

## (a) Market risk

### (i) Interest rate risk

Interest rate risk is the risk that the value of the Fund's Shariah-compliant investments and its return will fluctuate because of changes in market interest rates.

Interest rate is a general economic indicator that will have an impact on the management of the Fund regardless whether it is an Islamic unit trust fund or otherwise. It does not in any way suggest that the Fund will invest in conventional financial instruments. All the investments carried out for the Fund are in accordance with Shariah requirements.

The Fund's exposure to the interest rate risk is mainly confined to short term placements with licensed financial institutions. The Manager overcomes the exposure by way of maintaining Islamic deposits on short term basis.

As at end of each reporting year, the Fund is not exposed to a material level of interest rate risk as the Islamic deposits with licensed financial institutions are placed on a short term basis.

### (b) Credit risk

Credit risk refers to the risk that an issuer or counterparty will default on its contractual obligation resulting in financial loss to the Fund.

The credit risk arising from placements of Islamic deposits with licensed financial institutions is managed by ensuring that the Fund will only place Islamic deposits in reputable licensed financial institutions.

The settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the Securities Commission Malaysia's Guidelines on Unit Trust Funds.

The following table sets out the credit risk concentration of the Fund at the end of each reporting year:

	Cash at bank RM	Financial assets at FVTPL RM	Total RM
<b>2025</b>			
- AAA	28,085	83,800,886	83,828,971
- AA1/AA+	-	20,061,401	20,061,401

- AA3/AA-	-	15,231,649	15,231,649
Total	37,425	62,790,974	62,828,399

All financial assets of the Fund are neither past due nor impaired.

### (c) Liquidity risk

Liquidity risk is the risk that Shariah-compliant investments cannot be readily sold at or near its actual value without taking a significant discount. This will result in lower net asset value of the Fund.

The Manager manages this risk by maintaining sufficient level of Islamic liquid assets to meet anticipated payments and cancellations of the units by unit holders. Islamic liquid assets comprise cash at bank, Islamic deposits with licensed financial institutions and other Shariah-compliant instruments.

The table below summarises the Fund's financial liabilities into relevant maturity groupings based on the remaining period as at the end of each reporting year to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

	Less than 1 month RM	1 month to 1 year RM	Total RM
<b>2025</b>			
<u>Financial liabilities</u>			
Amount due to the Manager			
-management fee	12,733	-	12,733
Amount due to the Trustee	1,910	-	1,910

Other payables and accruals	-	10,233	10,233
Contractual cash outflows	16,836	10,233	27,069

### (d) Capital risk

The capital of the Fund is represented by equity consisting of unit holders' capital and retained earnings. The amount of equity can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the Shariah-compliant investment activities of the Fund.

**(e) Shariah status reclassification risk**

This risk refers to the risk of a possibility that the currently held Islamic deposits or Investment Account or Islamic money market instruments invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such deposits or conventional investment account or money market instruments.

**(f) Fair value estimation**

Financial instruments comprise financial assets and financial liabilities. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The information presented herein represents the estimates of fair values as at the date of the statement of financial position.

The Fund's financial assets and financial liabilities are measured on an ongoing basis at either fair value or at amortised cost based on the respective classification.

The fair value of financial assets traded in active markets (such as trading Shariah-compliant securities) are based on quoted market prices at the close of trading on the reporting date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques. The Fund uses a variety of methods and makes assumptions that are based on market conditions existing at each year end date. Valuation techniques used for non-standardised financial instruments such as Islamic options, Islamic currency swaps and other over-the-counter Islamic derivatives, include the use of comparable recent arm's length transactions, reference to other Shariah-compliant instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

For instruments for which there is no active market, the Fund may use internally developed models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. Valuation models are used primarily to value unlisted Shariah-compliant equity and sukuk instruments for which market were or have been inactive during the financial year. Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions.

The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Fund holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2); and
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that requires significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy of the Fund's financial assets (by class) measured at fair value:

	<b>Level 1 RM</b>	<b>Level 2 RM</b>	<b>Level 3 RM</b>	<b>Total RM</b>
<b>2025</b>				
<u>Financial assets at FVTPL:</u>				
- Islamic deposits with licensed financial institutions	-	136,709,761	-	136,709,761
<b>2024</b>				
<u>Financial assets at FVTPL:</u>				
- Islamic deposits with licensed financial institutions	-	62,790,974	-	62,790,974

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include Islamic deposits with licensed financial institutions. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

- (ii) The carrying values of financial assets (other than financial assets at FVTPL) and financial liabilities are a reasonable approximation of their fair values due to their short term nature.

#### 4. MANAGEMENT FEE

In accordance with Division 13.1 of the Deeds, the Manager is entitled to a management fee of up to 0.75% per annum with effect from 19 September 2019 calculated daily based on the net asset value of the Fund.

For the financial year ended 31 December 2025, the management fee is recognised at 0.10% (2024: 0.10%) per annum.

There is no further liability to the Manager in respect of management fee other than the amount recognised above.

#### 5. TRUSTEE'S FEE

In accordance with Division 13.2 of the Deeds, the Trustee is entitled to a fee not exceeding 0.015% per annum subject to a minimum of RM9,000 per annum calculated daily based on the net asset value of the Fund.

For the financial year ended 31 December 2025, the Trustee's fee is recognised at a rate of 0.015% (2024: 0.015%) per annum.

There is no further liability to the Trustee in respect of Trustee's fee other than the amount recognised above.

#### 6. TAXATION
